

Principles of Internal Auditing

For Food Processing Systems

CERTIFIED
Training and Education

Overview

This one-day course provides a full description of a comprehensive design for a food processing plant audit program. It will provide the details of the design and operation of the full audit program for the facility, and fundamental audit techniques for the auditor. You will leave the course with an understanding of the fundamental principles of internal auditing and their role as the standard experts.

NOTE: It is highly recommended that you complete an accredited HACCP (Hazard Analysis & Critical Control Points) training course before enrolling in SQF-2000 training. It is also recommended that you have a basic understanding of GFSI certification/code for auditing.

Upon course completion, participants will be able to:

- Understand the differences between audits and inspections
- Describe the various types of audits
- Equip staff with the skills necessary to create, conduct and maintain an effective internal audit program
- Explain the role of the audit team in planning, conducting and reporting the internal audit

Key Topics

- Reasons to Audit
- Managing an Audit Program
- Auditing Principles
- Conducting the Audit
- Checklist Against the Standard
- The Top Audit Failings
- Reporting
- Corrective Action Resolution
- Practicing with Mock Audits

Cost

\$295 per person, includes course materials and lunch.

Special Package Rate:

Enroll in both SQF-2000 and Principles of Internal Auditing for only: \$845!

Registration

To register, contact Amy Winkler at MMTC-West: (616) 771-0561 or winklera@rightplace.org.

NOTE: Class size is limited to the first 20 registrants.

About the Facilitator

Harry E. Grenawitzke

Grenawitzke, a certified public health professional, has worked in both the public and privately-held companies at local, national, and international levels. His exceptional leadership skills and participative management style have had a dramatic impact on food producers and the processing industry. Grenawitzke is currently a member of the Michigan Environmental Health Association, the National Environmental Health Association, and the Association of Food and Drug Officials.
